

NEW ADMINISTRATIVE RULE

At the close of the 2003 Idaho Legislative Session, IDAPA Rule 07.02.06.011.06 was formally approved. This rule reads:

Section 610.2 All new one (1) and two (2) family residences must have a pre-plumbed water softener loop. The kitchen sink must have one (1) hot soft line and one (1) cold soft line and one (1) cold hard line. Exterior cold hose bibbs intended for irrigation purposes must be piped with hard water. Provisions must be made for the discharge of the water softener to terminate in an approved location.

The Idaho State Plumbing Bureau will begin enforcing this new rule on December 1, 2003.
